EDUCATION

University of Southern California – Iovine and Young Academy, Los Angeles, CA

Bachelor of Science in Art, Technology and the Business of Innovation, May 2027, GPA: 3.85

- **Emphasis:** Computer Engineering and Product Management
- **Relevant Coursework:** XR Development (Graduate-Level), Object-Oriented Programming, Machine learning, Full-Stack Development, Startup Innovation Case Studies, Consulting for Product Strategy
- **Awards:** Transfer Merit Scholarship Recipient

PROFESSIONAL EXPERIENCE

King's Park Malaysia, Project Agatha: Immersive Exhibition Development, Los Angeles, LA

Project Manager - Innovation Operations, August 2025 - Present

- **Managing design, development, and construction of \$5M immersive technology exhibit**, orchestrating timeline and deliverables while leading cross-functional teams through key decision making pitches and stakeholder communication.
- **Constructing robust data-driven GenAI framework managing 14 autonomous agents via agile sprints**, converting unstructured ideation into predictable workflows that reduced decision latency by 50% while preserving creative authenticity through RAG prompt engineered guidance.

Verci: Third-Space Startup, New York City, NY

Technical Product Manager, June 2025 - Oct 2025

- **Designed data analytics-based strategy** for Creative Coworking Club that scaled community **8x** (400 → 3200) while driving **300% event attendance growth** with **30% six-week retention**, validating product-market fit via consumer interviews and ad campaigns.
- **Reduced outreach costs by 90%** (10→1 hour weekly) through an **AI agentic architecture** with integrated A/B testing and **robust filtering**, enabling personalized campaigns that self-optimize through data.
- **Developed Innovative GenAI prompt engineering workflow** to build backend ETL pipeline, **migrating community profiles** with Airtable scraping into Supabase, implementing LLM generative AI analysis to decode member psychographics for audience targeting strategies.

Guardian Inc., EdTech Hardware Providing International Access to Learning Resources, Los Angeles, CA

Founding Product Engineer, October 2024 – May 2025

- **Optimized \$2,000 budget** through component research, achieving **90% cost reduction** with custom 3D printed parts versus commercial solutions while maintaining standard tolerances.
- Engineered a **3D printer farm** with custom mechanical, electrical, and software integration to enable 24/7 production.
- **Led R&D iterations** with modular CAD workflow using Fusion 360, allowing simultaneous component development and reducing design cycles for rapid prototyping

INVOLVEMENT

USC Formula Electric, Los Angeles, CA

President and Creative Director, November 2024 – Present

- Drove **175% follower growth** and **100K+ views** during off-season by directing cross-functional creative team, while coordinating VFX and cinematography talent to expand reach beyond technical audiences.
- **Founded business operations** by developing the first business cohort into operational leaders aligned with strategic objectives, securing **corporate sponsorship**, assembling a creative media team, and managing collaboration events.
- **Strengthened institutional partnerships** by **securing \$20,000** through competitive proposals to Viterbi and USC government, managing funding pipelines while aligning resources across 8 technical teams.

SKILLS & INTERESTS

Technical Skills: React, SQL, Typescript, Java, Python, C++, Prompting, GenAI, Agile/Scrum, Algorithms, PyTorch, Github

Tools: Adobe Photoshop, Premiere Pro, Figma, Fusion360, After Effects, Miro, Airtable, Zapier, Vercel, Notion, Supabase

Interests: Backpacking across South East Asia and documenting stories with local villages
